1. UPDATED HEADLINE

```
Infection Control Consultant, Stanford Health Care | CLABSI Taskforce Lead | Chief
Quality Officer, InterviewAnswers.ai | MPH, BSN, RN
```

(128 characters — well within LinkedIn's 220-character limit)

---

2. UPDATED ABOUT SECTION

(Copy everything between the --- lines)

I work in infection control at Stanford Health Care, overseeing units from medical and surgical floors through ICU acuity care. I lead our CLABSI Taskforce and work daily with nursing teams across specialties.

One thing I've noticed over the years: incredible nurses — people who are sharp, compassionate, and deeply experienced — struggle to translate that into interviews. They know exactly what to do at the bedside but freeze when someone asks them to talk about it in a panel.

That's why I took on the role of Chief Quality Officer at InterviewAnswers.ai. I've been curating specialty-specific nursing interview questions grounded in the frameworks we actually use — NCSBN, SBAR, Nursing Process — and gathering feedback from peers to make sure the content is accurate, relevant, and reflects what real nursing interviews look like.

The AI coaches how you communicate your experience. It doesn't generate clinical content or replace your education. Every question has been clinically reviewed. That was my line, and it hasn't moved.

If you or someone you know has a nursing interview coming up, it's free to try: https://www.interviewanswers.ai/nurse

3. EXPERIENCE ENTRIES (Two New Entries)

Entry A — Stanford Health Care (Add This First)

Title: Infection Control Consultant **Company:** Stanford Health Care **Date:** *(Erin: enter your start date)* – Present **Location:** Stanford, California

Description: Oversee infection prevention and control across medical, surgical, and ICU acuity care units. Lead the CLABSI (Central Line-Associated Bloodstream Infection) Taskforce, coordinating evidence-based interventions to reduce hospital-acquired infections. Work daily with nursing teams across specialties to implement and monitor infection control protocols, conduct surveillance, and drive compliance with

regulatory standards. Collaborate with interdisciplinary teams on quality improvement initiatives grounded in CDC, Joint Commission, and APIC guidelines.

Entry B — InterviewAnswers.ai (Add This Second)

Title: Chief Quality Officer **Company:** InterviewAnswers.ai **Date:** Jan 2026 – Present *(Erin: confirm your actual start date)* **Location:** Remote

Description: Overseeing clinical content quality for a nursing interview preparation platform used by individual nurses preparing for clinical roles. Curated and reviewed 67+ specialty-specific interview questions across 8 nursing specialties (ED, ICU, OR, L&D, Pediatrics, Psych, Med-Surg, Travel Nursing). All content grounded in published clinical frameworks including NCSBN Clinical Judgment Model, SBAR, and the Nursing Process. Gathering peer feedback to validate content accuracy and relevance. Established quality standards ensuring AI coaches communication skills only — no AI-generated clinical content.

---

4. LINKEDIN GROUPS TO JOIN

Join these groups to expand your nursing network and share content with relevant audiences:

Priority (join first):

- **APIC - Association for Professionals in Infection Control** — your home turf, infection prevention peers
- **Nursing Career Connections** — nurses actively job searching or transitioning roles
- **Travel Nursing Network** — one of our 8 specialties, very active community
- **New Graduate Nurses** — high-intent audience, actively interviewing

Secondary (join when ready):

- **Emergency Nurses Association (ENA)** — ED nursing community
- **Critical Care Nursing** — ICU nurses
- **Nursing Professionals Worldwide** — large general nursing group
- **Perioperative Nurses** — OR nursing community

Avoid: Hospital administrator groups, nursing school/faculty groups, healthcare IT groups (not our audience)

---

5. LINKEDIN POST

(Copy everything between the --- lines. Post this AFTER updating your profile.)

I've spent years working in infection control at Stanford Health Care — overseeing units from med-surg through ICU, leading our CLABSI Taskforce, and working alongside nursing teams across specialties.

One pattern I keep seeing: nurses who are exceptional clinicians but struggle to communicate that in interviews. They know exactly what to do in a code, how to advocate for their patients, how to catch what others miss — but when someone puts them in front of a panel and says "Tell me about a time when…" they freeze.

I wanted to do something about that.

I've been working as Chief Quality Officer at InterviewAnswers.ai, where I've been curating specialty-specific nursing interview questions and gathering input from nursing peers to make sure the content reflects what

real interviews actually look like.

Here's what matters to me about this:

→ Every question is grounded in the frameworks we use daily — NCSBN, SBAR, Nursing Process → The AI coaches how you communicate your experience — structure, specificity, confidence → It never generates clinical content or replaces your education → 8 specialties covered: ED, ICU, OR, L&D, Peds, Psych, Med-Surg, and Travel Nursing

I collected feedback from nurses across different settings and experience levels to make sure this actually helps. That process is ongoing — if you try it and have thoughts, I want to hear them.

(~1,380 characters — well within LinkedIn's 3,000-character limit. Short enough to perform well in the algorithm.)

---

6. SCREEN RECORDING SCRIPT — Nursing Track Demo Video

Purpose

A 45-55 second square video showing the nursing track in action. Post it alongside or shortly after the LinkedIn post. LinkedIn autoplays video muted, so text overlays carry the message.

Pre-Recording Setup

1. **Browser:** Chrome, clean state
    - Hide bookmarks bar (Cmd+Shift+B on Mac)
    - Close all other tabs
    - No extensions visible
2. **Account:** Log into the beta account (the one with session history so dashboard stats aren't all zeros)
3. **Window size:** Resize browser to roughly 500px wide for a cleaner, mobile-like look
    - Or use Chrome DevTools → Toggle Device Toolbar → choose "iPhone 14 Pro"
4. **Recording tool:** QuickTime Player (Mac) → File → New Screen Recording → select the browser window area
    - Or use OBS (free) for more control
5. **Speed:** Navigate slowly and deliberately. Quick movements look jarring when compressed. Pause 1-2 seconds on each screen before moving.

Shot List

Record these 10 shots in sequence. Don't stop between them — record it as one continuous take, then trim in editing.

Shot	What's on Screen	What to Do	Hold For	Text Overlay to Add Later
1	Landing page hero	Navigate to `interviewanswers.ai/nurse`. Let it load fully.	5 sec	**Nursing interview prep that actually works.**
2	Features grid	Slowly scroll down past the problem section until you see the features (AI Mock Interviews, SBAR Drills, STAR Coaching, etc.)	5 sec	**8 specialties. SBAR drills. STAR coaching.**
3	Clinical integrity section	Continue scrolling to the "Clinical integrity is non-negotiable" / walled garden section	4 sec	**Every question clinically reviewed.**
4	Specialty selection	Click "Start Free" or log in and go to `/nursing`. You should see the 8 specialty cards.	5 sec	**Choose your specialty.**
5	Dashboard	Click "Emergency Department" (or whichever has the most session data). Dashboard loads with stats + practice mode cards.	6 sec	**Your dashboard tracks everything.**
6	Quick Practice feedback	Click "Quick Practice" → you may need to answer a question or show a previous feedback result. Show the 4-section AI feedback breakdown.	7 sec	**Practice a question. Get instant AI coaching.**
7	SBAR Drill	Navigate back → click "SBAR Communication." Show the SBAR interface with the S-B-A-R component labels.	5 sec	**SBAR drills with per-component scoring.**
8	Mock Interview	Navigate back → click "Mock Interview." Show the chat-style conversational interface with the AI interviewer.	5 sec	**Full mock interviews that adapt to you.**
9	Command Center	Navigate back → click "Command Center." Show the analytics/progress tab with charts or the question bank.	4 sec	**Track your progress. Know when you're ready.**
10	Closing	Navigate back to the landing page OR just hold on a clean screen.	4 sec	**Free to try. Built by nurses, for nurses.** *(smaller text below:)* **interviewanswers.ai/nurse**

Total recording time: ~50 seconds

Post-Recording: Adding Text Overlays

Recommended tool: CapCut (free, available on Mac/iOS/web)

- Import your screen recording
- For each shot, add a text overlay:
  - **Font:** Clean sans-serif (e.g., Inter, Helvetica, or CapCut's default)
  - **Size:** Large enough to read on mobile
  - **Color:** White text
  - **Background:** Dark semi-transparent bar behind the text (CapCut calls this "text background" — set to black at 60-70% opacity)
  - **Position:** Bottom third of the frame
  - **Timing:** Match each overlay to its shot (use the shot list durations above)

Export settings:

- Aspect ratio: **1:1 (square)** — best for LinkedIn feed on desktop + mobile
- Resolution: **1080 x 1080**
- Format: MP4

Upload: Upload the video directly to your LinkedIn post (not as a YouTube/Vimeo link — native video gets 5x more reach on LinkedIn).

---

7. POSTING CHECKLIST

Before Posting

- [ ] Update LinkedIn headline (Section 1)
- [ ] Update LinkedIn About section (Section 2)
- [ ] Add InterviewAnswers.ai as Experience entry (Section 3)
- [ ] Join at least 2-3 LinkedIn groups from the list (Section 4)
- [ ] Confirm your start date on the Experience entry
- [ ] Record the demo video using the shot list (Section 6)
- [ ] Add text overlays in CapCut and export

Posting

- [ ] Copy the post text from Section 5
- [ ] Attach the demo video (upload directly, don't paste a link)
- [ ] Review one final time → Post

After Posting (within first 2 hours — this is when the algorithm decides reach)

- [ ] Share post link with Lucas so he can like + comment
- [ ] Comment on Lucas's existing launch post linking to your post (cross-pollination)
- [ ] Respond to every comment on your post — the algorithm rewards early engagement
- [ ] Share in 1-2 of the nursing LinkedIn groups you joined (use the "Share" button on your post)

Follow-Up (next 1-2 weeks)

- [ ] Check post analytics after 24 hours (note: impressions, reactions, comments)

- [ ] If engagement is strong: write a short follow-up post with one specific insight (e.g., "The #1 mistake I see nurses make in interviews is...")
- [ ] If anyone asks clinical questions in comments: redirect them to the app, don't answer clinical Qs on LinkedIn

---

NOTES FOR ERIN

Your title on LinkedIn uses InterviewAnswers.ai (not NurseInterviewPro.ai) — we're keeping official titles under the parent company. NurseInterviewPro is a marketing name for the nursing landing page.

You don't need to mention the tech stack. Lucas handles the engineering side. Your credibility is clinical — lean into that.

If someone asks "Can this replace NCLEX prep?" in the comments: No. It coaches interview communication. It doesn't replace clinical education, NCLEX prep, or CE requirements. Good redirect: "This helps you communicate what you already know — it's not a clinical reference."

Save this file. Copy-paste when ready. Questions → ask Lucas.
